Dear Mr. Dansie:

I appreciate your taking the time to visit with me concerning the revision you have requested for the development of the Security Claims 1 thru 4. Your request is a revision of the Plan of Operations approved on September 20, 1993.

After review of the revised plans and maps submitted by you and Mr. Robert Steele, I give approval and make the revised plan part of the approved Plan of Operations. This is in accordance with the procedure listed as item 3 under Standard Forest Service Mitigations, which is included under Section VI. Forest Service Evaluation of Plan of Operations, Part A. Recommended Changes/Modifications for Plan of Operations.

I appreciate the cooperation that you have extended while working on this project. I hope you will keep us informed as to the progress of this mining operation.

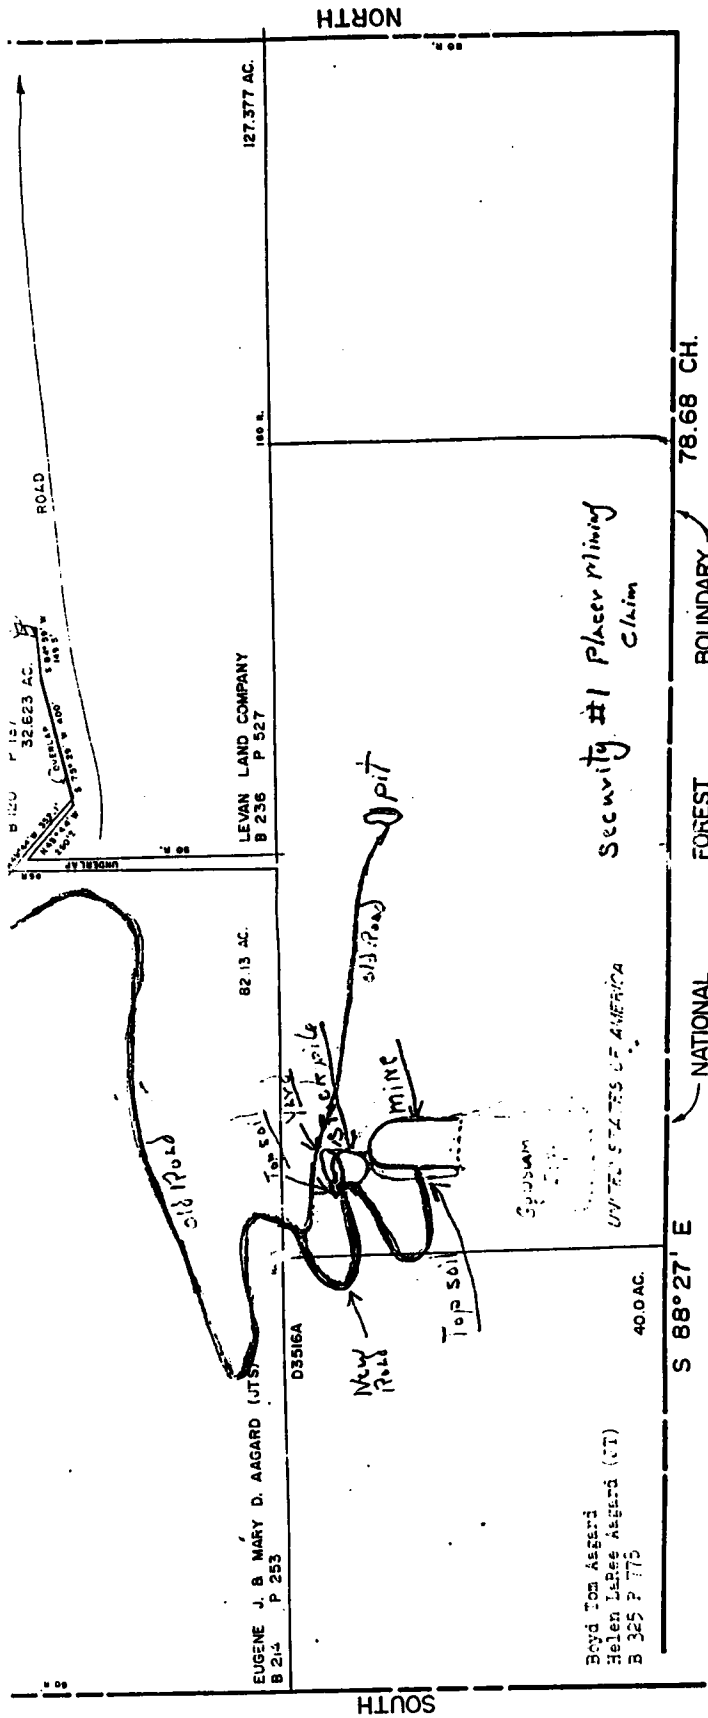

Sincerely,

THOMAS H. SHORE
District Ranger

NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

* * * * *

I. GENERAL INFORMATION (Rule R613-003-104)

1. Name of Claim/Mine: The Security #1
2. Name of Operator/Applicant: Robert Steele
Company () Corporation () Partnership () Individual ☒
3. Permanent Address: 1055 N. 4 East
City: Nephi State: UT Zip Code: 84648
Telephone Number: (801) 623-1877

4. Ownership of Land Surface:

Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☒
State of Utah ☐ Other: United States of America

5. Ownership of Minerals:

Private (Fee) ☐ Public Domain (BLM) ☐ National Forest (USFS) ☐
State of Utah ☐ Other: Staked under The 1872 Mining Law

WANTLASH NATIONAL FOREST
DISTRICT MANAGER
EPHRAIM, UTAH

JUN - 31994

RECEIVED

Utah Mining Claim Number(s) UMC-1170225 117025

Utah State Lease Number(s) _____

6. Have the above owners been notified in writing? Yes ☒ No ☐
If no, why not? _____

7. Does the operator have legal right to enter and conduct mining operations on the land covered by this notice? Yes ☒ No ☐

II. PROJECT LOCATION & MAP (Rule R613-003-105)

1. Project Location (legal description):

County(ies): Just County State of Utah

1/4, 1/4, 1/4:	<u>S.E.</u>	Section:	<u>33</u>	Township:	<u>14 S.</u>	Range:	<u>1 E</u>
1/4, 1/4, 1/4:	<u>S.W.</u>	Section:	<u>33</u>	Township:	<u>14 S.</u>	Range:	<u>1 E</u>
1/4, 1/4, 1/4:	_____	Section:	_____	Township:	_____	Range:	_____

2. A topographic base map showing the location of the proposed small mining operation must be submitted with this notice. A USGS 7.5 minute series map is preferred. The areas to be disturbed should be plotted in sufficient detail so that they can be located on the ground. It is recommended that the operator also plot and label any previous disturbances in the immediate vicinity that he is not responsible for.

III. OPERATION PLAN (Rule R613-003-106)

1. Type of mining: Surface ☒ Underground ☐

2. Mineral(s) to be mined: Gypsum

3. Provide a brief description of the proposed mining operation and onsite processing facilities. Gypsum will be mined by the open-pit method. Bulldozers, loaders, Drills and Pack-Trucks will be used. Gypsum will be mined. Stacks piled and then loaded and hauled to a mill site to be crushed away from mine or private property.

New Road(s): Length 1500 (ft) Width 20 (ft)

Total project surface acreage to be disturbed 3 1/2 (acres)

Revision to Plan of Operation approved 9/20/93
Security Claims 1 - 4

IV. Description of the Operation

- A. This revised Plan of Operations covers the development of gypsum deposits located in Security #1 thru #4 mining claims, the same as the original. Both the original and this revised plan places emphasis on recovery of the gypsum in Security #1. This revised plan is for a deposit located approximately 1000 feet west, at approximately the same elevation of the deposit described in the original plan.

The pit to be opened is 150 feet by 300 feet, which is somewhat smaller than the original. At present, the deposit in the original plan will not be developed for 10 - 15 years. The reason for the revision is to move the operation to a slope that new, specialized equipment could be used, making for less environmental disturbance and easier reclamation.

An access road of 1500 feet will be needed, which will be designed at an average 8 to 10 percent grade. The road bed width will be 15 feet. The road surface will be of natural material.

The road standard will be the same as the road described in the approved plan. Basically, the same length of road is needed for access. Equipment to be used: a 250 Reclaimer a D6 dozer, a 5 yard loader and 2 ten wheel trucks.

The disturbed acres will be basically the same on the Forest for both plans.

IV. Description of the Operation

- C. All possible topsoil will be salvaged and stockpiled to the east of the pit as shown on the Mine Plan Map. Topsoil piles will be vegetated to maintain and safeguard the piles and prevent loss.

Trees and shrubs will be cleared from the pit area and winrowed on the east side of the pit adjacent to the topsoil stockpiles. Upon reclamation, the material will be pulled and scattered across disturbed slopes.

A stockpile area will be constructed to the northwest of the pit. The area will be constructed as the access road is built. Drainage will be controlled by basin behind stockpile area. The drainage area above the stockpile area is small and heavily wooded.

Other than the drilling and shooting, this revised plan is basically the same as the original. However, if the 250 Reclaimer does not prove successful, drilling and shooting may be reconsidered.

All mined material will be removed from forest land. It is estimated the annual production of the revised plan will be the same as the original, being 30,000 tons per year.

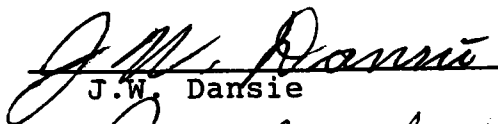

V. Environmental Protection Measures

For the revised plan, there are no changes from the contents of the original plan.

The State of Utah- Operation and Reclamation Practices (Rule R613-003-107 thru 109) will be followed.

The Forest Service Recommended changes/modifications for Plan of Operations will be complied with as described in the original Plan of Operations.

Submitted Respectfully June 28, 1994,

J.W. Dansie

Robert L. Steele
